April 10, 2020

We are excited to announce we have received notification that the IRS issued 75 million economic impact payments on Friday, April 10, 2020. These funds will be reportedly available for direct deposit to qualified Americans on April 15, 2020. While we are unaware of who will receive deposits or how they were selected for this first round, we do expect to begin receiving payments as early as mid-next week.

In an effort to provide the most efficient service possible we are encouraging all members to **download our mobile app** which will provide real-time notification if you receive a deposit.

We expect our phones and drive-thru to experience longer wait times next week due to these payments, we appreciate your patience as staff are working hard to serve the needs of our members with reduced resources. While many of our staff are not available face-to-face they are available to serve you via phone, text message, and other electronic means. If we can be of any assistance at all feel free to reach out. We will be posting additional information throughout the weekend. I hope you are all fairing well through these trying times, stay safe!
